

# Wing Firmware Update Process

**Important:**

**Save your show files before updating!**

## **Via USB Stick**

1. Connect the USB stick to the top panel USB port of WING.
2. Open SETUP/GENERAL page and tap the UPDATE icon on the left of the screen.
3. Select the correct FW update file and tap on UPDATE.
6. After the update is completed, you will be prompted to reboot the console.

## **Via Computer**

1. Connect a USB cable to the rear panel USB port and to your computer.
2. Either hold the blank button on the main display during power-up or open the SETUP/GENERAL Edit page in order to enable WING OS.
3. A drive icon will appear on your computer, like connecting a flash drive or external hard drive. Double click the drive to open.
4. Extract the firmware zip file and drag/copy the new firmware file into the WING OS drive.
5. After copying is completed, please eject the WING OS drive from your computer.
6. WING should reboot automatically a few seconds after ejecting the drive. If it doesn't, please power cycle the console.
